

SOUTH SIDE ALIGNMENT

Existing (non-ADA) ramp connects to the Eastbank Esplanade.

- ### Strengths
- Provides good connections to Water Ave and into Downtown
 - Uses existing 5' sidewalk
 - Provides good access to Naito Parkway
 - Provides access to Esplanade
 - Can be built with existing budget
 - Good views

- ### Weaknesses
- Does not make connections to Grand Avenue
 - Esplanade Ramp does not meet ADA requirements

- ### Staff Recommendation: YES
- Avoids the expensive structures required of the other two alignments
 - Provides good access to Downtown, Naito Parkway (and Waterfront Park), the Esplanade, and the eastside bikeway network
 - Makes use of the existing southside sidewalk
 - Allows maximum pathway width
