

WATER AVENUE RAMP OPTIONS

BASIC IMPROVEMENT

The existing intersection creates awkward movements for all, and requires pedestrians and cyclists to cross the ramp to access the sidewalks and street.

The cost of leaving the ramp as is, but adding additional sidewalk and a marked crosswalk is included as part of the basic improvements.

ENHANCED IMPROVEMENT OPTION

Creating separate intersections would eliminate the need for pedestrians and cyclists to cross the ramp. It would also simplify moves for motorists.

The cost estimate for this option is \$297,000.
